

# ASPART-X™ IC-320 TOPCOAT

ASPART-X™ IC-320 is the latest innovation from LINE-X® Protective Coatings. A ZERO VOC, aliphatic polyurea, ASPART-X U/V Protective Coatings provide superior U/V stability with excellent color and gloss retention. When used as a topcoat over other products in the LINE-X family, ASPART-X creates a tough, durable, U/V stable topcoat that won't fade, keeping that like-new look for years to come. Available in standard or custom colors, ASPART-X is a versatile coatings solution with virtually limitless possibilities. No matter what your needs, your ASPART-X U/V Protective Coatings application will provide superior protection for your investments.

## ASPART-X Features & Benefits:

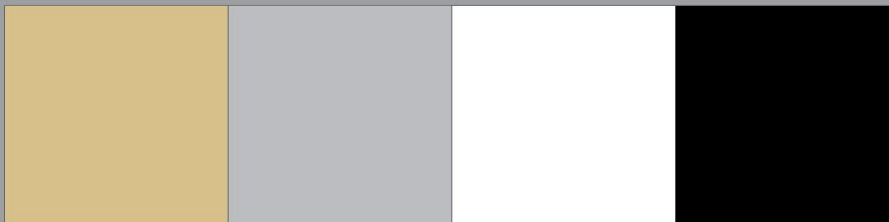

- Durable, Scuff-Resistant Coating
- U/V Stable, High-Gloss and Color Retention
- Clear, High-Gloss Sealer for any Surface
- Replacement for Epoxies and Polyurethanes
- Optional Non-Skid Finishes Available
- Professionally Applied

### OPTIONAL NON-SKID FINISHES ARE ALSO AVAILABLE:

NS-75 or NS-100 are recommended for most common applications and provides adequate traction and an easy to clean surface. For a more aggressive non-skid surface, NS-50 or NS-20 is recommended.

ASPART-X is available in tan, gray, white, black and clear. Custom colors can be special-ordered to your specification for a wide range of coatings and topcoat applications. Ask your LINE-X Professional for additional details.
